WORK EXPERIENCE

Software Engineer

June 2023 – present

NextStep Tech

- Actively collaborate within a dynamic team to conceptualize, develop, and deploy bespoke software solutions tailored to precise client specifications.
- Initiate and participate in client consultations to comprehensively understand project requirements, proactively offering solutions that strategically align with their business objectives.
- Cultivate effective client relationships by engaging in collaborative consultations to discern project requirements, troubleshoot issues, and deliver times.
- Showcase proficiency in a diverse technology stack, including Python, HTML5, SQL, Github, and Visual Studio, to craft clean, efficient, and maintainable code that aligns with industry best practices.

Manager

March 2016 – Present

Walid Petroleum LLC

- Oversee operations across two locations, leading a team of 4 to 6 employees, ensuring seamless workflow and adherence to company standards.
- Facilitate the meticulous completion of daily paperwork, subsequently submitted to the accountant, demonstrating a commitment to precision in financial management.
- Play a pivotal role in the recruitment process, contributing to candidate interviews, hiring decisions, and comprehensive training programs that align with company policies and superior customer service standards.
- Proactively manage bank deposits and contribute to strategic financial decisions, exhibiting a hands-on approach to optimizing investments in new ventures.

PROJECTS

Portfolio Website | *HTML, CSS, JavaScript*

It is a portfolio website that utilize my skills in HTML, CSS and JavaScript

- An online platform showcase work, projects, skills, and achievements
- Has access to all my other socials like Github and LinkedIn
- You can get an updated version of my resume

Documentation Compliance Solutions | *Python, Flask, HTML5, JavaScript, SQLite3*

Developed an application designed to streamline the tracking of individuals and associated documentation.

- The user-friendly web interface ensures a seamless experience.
- Implemented a secure sign-up process, granting each user a private account for efficient management of their drivers and related documentation.
- Incorporated an automated system that proactively checks for documents nearing expiration within a specified time-frame. Account holders receive timely email notifications, ensuring proactive management of documentation compliance.
